

Regarding substances on the REACH Regulation (EC) No. 1907/2006 Candidate List and the UK REACH Candidate List

The EU regulation (EC) No. 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (“**REACH**”) is the main EU law to ensure a high level of protection of human health and the environment against the risks that can be posed by chemical substances. Following the UK’s departure from the EU, an adapted version of REACH applies within Great Britain (which is generally referred to as “**UK REACH**”).

Article 33(1) REACH requires that the supplier of an article communicates to the recipient of the article sufficient information available to the supplier on certain substances present in the article to allow safe use of the article.

Article 33(1) REACH applies to substances in articles meeting all the following criteria: **(i)** the substance is identified as a Substance of Very High Concern (“**SVHC**”) according to Article 57 REACH, **(ii)** the substance is included in the Candidate List to REACH <https://echa.europa.eu/candidate-list-table> (UK: <https://www.hse.gov.uk/reach/candidate-list.htm>) and **(iii)** the substance is present in the article in a concentration above 0.1% weight by weight (w/w). This threshold applies to each article of a product that made up of more than one article, which were joined or assembled together (complex products). This means that the concentration of SVHC is not calculated on the w/w of the whole (complex) product, it is calculated on the specific article.

Our current knowledge regarding presence of SVHC included in the Candidate List to REACH in a concentration above 0.1% w/w in our articles is as follows.

Lead (CAS no. 7439-92-1)

Lead is commonly used in steel and brass to improve machinability, in general in accordance with applicable ISO-standards. The following categories of our tools contain small articles made of steel and/or brass and could therefore contain more than 0.1% w/w lead in that small article.

- [Dampened Tools](#)
- [Coolant kits and accessories for coolant connections](#)
- [Boring adaptors and cartridges](#)
- [Tools and adaptors with coolant plugs](#)
- [Tools and adaptors with adjustable nozzles](#)

Relevant end products, including article numbers, that contain small articles made of steel and/or brass above 0,1%w/w lead are listed below. The list is regularly updated as relevant. For relevant safety information see <https://www.sandvik.coromant.com/safetyinfo>. Under normal operating conditions, the use of articles containing such components does not require any special safety precautions beyond normal safety procedures such as gloves. Disposal of all waste products and containers shall be made in accordance with local, state/provincial, federal and national regulations.

We are continuously evaluating the possibilities to replace articles containing lead in our products to lead-free articles. Such replacements are done after an overall assessment taking into account factors such as risks, characteristics, and technical performance.

We do not have any indications that any other SVHC are present in a concentration above 0.1% w/w in our products, including hardmetal (cemented carbide) inserts supplied by us. Should, however, through our continuous monitoring, any conflicting information appear which concerns products supplied by us, you will be provided with information in this regard.

Dampened Tools

A family of tool holders under the trademark of Silent Tools™. The tool holders are designed to minimize vibrations through a dampener inside the tool body.

Phasing out of components containing lead is ongoing, with implementation end of 2024.

Articles below are the end products containing the substance in a presence of > 0.1% w/w lead:

Boring adaptors and cartridges

Certain boring adaptors and cartridges such as CoreBore® contain small components in the form of bearings (washers/plates) and/or coolant plugs made of steel which have a presence of lead.

Tools and adaptors with coolant plugs

Certain tools and adaptors, such as listed below, contain small components in the form of coolant plugs made of steel which have a presence of lead.

- Coromant Capto® cutting units for Turning
- Boring Bars for Turning
- Shank tools for Parting & Grooving
- Modular cutting heads for Parting & Grooving
- Milling cutters - CoroMill® 745/725 and CoroMill® 390 Long-edge
- Modular adaptors - Coromant Capto® and HSK
- Hydraulic clamping units and their accessories

Articles below are the end products containing the small components with a presence of > 0.1% w/w lead:

Tools and adaptors with adjustable nozzles

Certain tools and adaptors contain small components in the form of adjustable nozzles made of brass which have a presence of lead.

Articles below are the end products containing the small components with a presence of > 0.1% w/w lead:

Material ID	Article code	Substance present in a concentration > 0.1% w/w
